Professional Summary

Detail-oriented Manual QA Engineer with hands-on experience in data validation, workflow testing, and defect identification within Agile environments. Skilled in test case design, functional testing, and end-to-end workflow validation. Experienced in supporting data pipelines and ensuring data quality through structured validation techniques. Strong analytical thinker with excellent communication skills, capable of interacting with cross-functional teams and supporting customer testing sessions. Familiar with automation concepts, REST APIs, and continuous testing practices.

Education

Master of Computer Applications (MCA)	2024 – 2026
Alliance University, Bangalore	CGPA: 9.2
B.Sc. Mathematics	2021 – 2024
Amrita Vishwa Vidyapeetham, Coimbatore	CGPA: 6.3

Experience

Mainframe Developer Intern	Dec 2025 – Present
Teamware Solutions	
- Performed manual testing and validation of batch workflows in IBM z/OS - Designed test scenarios and ensured data accuracy through validation checks - Identified, documented, and tracked defects with clear reproduction steps - Supported regression testing and analyzed logs to detect anomalies - Collaborated in Agile teams and provided Level 1 support for issue resolution	

Technical Skills

Programming: Python, SQL, COBOL

Testing: Manual Testing, Functional Testing, Regression Testing, Test Case Design, Defect Tracking

Data: Data Validation, Data Quality Checks, Data Reconciliation

Tools: Excel, Google Sheets, Flask, Git, GitHub

Concepts: QA Methodologies, SDLC, STLC, Agile, Workflow Testing

APIs: Basic understanding of REST APIs

Projects

PDF to Audio Generator (Flask Backend)

- Developed and tested end-to-end workflow for PDF-to-audio conversion
- Created test scenarios to validate text extraction and transformation accuracy
- Performed functional testing to ensure correct output generation
- Identified and resolved processing errors across multiple workflow stages
- Ensured data consistency and reliability through validation checks

Twitter Sentiment Analysis

- Validated and tested data preprocessing pipeline for accuracy and consistency
- Performed data quality checks on 10,000+ records
- Designed test scenarios for data transformation and analysis stages
- Identified inconsistencies and improved data processing reliability

COBOL-Based Payroll System

- Tested financial data processing logic for accuracy and consistency
- Applied validation checks and identified logical defects
- Ensured correctness of payroll calculations through structured testing

Achievements

- Strong analytical and problem-solving skills with focus on data accuracy and operational efficiency
- Achieved 65+ WPM typing speed with high accuracy
- Represented college as a **Badminton Player**
