Professional Summary

MCA student with a 9.2 CGPA and strong analytical, problem-solving, and data interpretation skills. Hands-on experience in SQL, Python, Excel, and business application development. Proven ability to gather requirements, analyze data, identify trends, and design solutions that improve operational efficiency. Seeking a Business Analyst role to leverage technical and analytical skills to drive data-driven business decisions.

Technical Skills

Business Analysis: Requirements Gathering, Gap Analysis, Process Mapping, BRD/FRD Documentation, User Stories, Acceptance Criteria
Data Analysis: SQL, Python (Pandas, NumPy), Microsoft Excel, Data Visualization
Tools: Excel, PowerPoint, Word, Jupyter Notebook, Git, GitHub
Databases: MySQL, MSSQL, DB2
Methodologies: SDLC, Agile, Scrum
Core Skills: Analytical Thinking, Stakeholder Communication, Problem Solving, Documentation

Experience

Mainframe Developer Intern Dec 2025 – Present
Teamware Solutions

- Analyzed business requirements and translated them into application logic using COBOL, JCL, and DB2.
- Automated validation and reporting for 10,000+ records using Python and SQL.
- Performed root cause analysis on production issues and documented findings.
- Prepared reports and insights to support operational and business decisions.
- Collaborated with cross-functional teams to improve process efficiency and data accuracy.

Projects

AI-Powered Blood Donor Matching System — Python, Machine Learning, MySQL

- Proposed a data-driven platform to match blood donors and patients based on blood group, location, and urgency.
- Analyzed donor response patterns to prioritize the most suitable donors.
- Designed dashboards for hospitals to monitor requests and availability.
- Shortlisted for the AI For Good 2.0 Hackathon hosted by HackCulture.

Goal Tracking App — Flutter, Dart, MSSQL

- Developed an application to track goals, monitor progress, and analyze user performance.
- Designed database schemas and reporting features for data-driven insights.

All-in-One Fitness App — Flutter, Dart, MSSQL

- Built a platform for workout planning, diet tracking, membership management, and event analysis.
- Developed admin dashboards to monitor user engagement and operational data.

Paddy Farm Management System — COBOL, DB2

- Developed a business application to calculate payroll, production costs, revenue, and net profit.
- Identified the most profitable market pricing strategy through data analysis.

Bus Pass Management System — Java Swing, MySQL

- Automated student bus pass applications and approval workflows.
- Generated reports to support administrative decision-making.

Education

Master of Computer Applications (MCA) 2024 – 2026
Alliance University, Bangalore CGPA: 9.2/10
Bachelor of Science in Mathematics 2021 – 2024
Amrita Vishwa Vidyapeetham, Coimbatore

Achievements

Solved 300+ coding problems across LeetCode, HackerRank, and CodeStudio.
Built multiple analytical and business-focused applications using Python, SQL, Excel, and databases.
